

Alen Kurian Joseph

Full-Stack Developer

Kannur | alenkurian23@gmail.com | +91 8943503267 | linkedin.com/alenkurian | github.com/alenkurian

SUMMARY

Enthusiastic B.Tech Computer Science graduate with practical experience in full-stack web development. Skilled in building scalable, user-friendly applications using modern technologies. Passionate about developing efficient software solutions and contributing to innovative, collaborative, and growth-oriented development teams.

Experience

MERN Stack Intern, Luminar Technolab - Kakkanad

July 2025 – Feb 2026

- Developed responsive web interfaces using React.js, JavaScript, Tailwind CSS, and Bootstrap, improving application performance and user experience while collaborating in Agile teams using Git/GitHub.
- Built and maintained RESTful APIs using Node.js, Express.js, and MongoDB to support secure backend functionality, efficient data management, and timely project delivery.

Projects

MariTime - AI-Powered Maritime Document Clearance System

github.io/Maritime

- Developed an AI-powered maritime document processing platform using FastAPI, Next.js, PostgreSQL, Neo4j, and Ollama (Mistral) to automate port clearance workflows and compliance validation.
- Built an OCR and AI-based extraction pipeline supporting PDFs, scanned documents, images, DOCX, ODT, and CSV files using Tesseract OCR, PyPDF2, and local LLM-based structured data extraction.
- Implemented a Neo4j knowledge graph to map port-document relationships and automate clearance verification by matching uploaded documents against destination port compliance requirements.

HostHub - Event Management and Ticket Booking Platform

github.io/HostHub

- Developed a full-stack MERN event management platform using React.js, Node.js, Express.js, and MongoDB with JWT authentication, role-based authorization, and RESTful API architecture.
- Integrated Stripe payment gateway and QR code-based ticket generation to enable secure online bookings, seamless payment processing, and efficient digital event ticket management for users and organizers.
- Designed dynamic admin and organizer dashboards featuring event approval workflows, real-time booking updates, protected routes, state management, and responsive UI using Tailwind CSS and modern React Hooks.

Restaurant Table Booking Web Application — React and Firebase

github.io/Restaurant

- Developed a restaurant reservation system with user authentication, restaurant browsing, and table booking based on selected dates and time slots.
- Built an admin dashboard to manage restaurants, tables, and booking schedules with real-time updates.
- Integrated Firebase Authentication and Cloud Firestore for secure user authentication and data storage.

Education

B-Tech in Computer Science and Engineering, KTU University

Nov 2021 – Apr 2025

Vimal Jyothi Engineering College, Kannur, Kerala

SKILLS

Programming Languages: C, Python, JavaScript, TypeScript, HTML, CSS

Libraries and Frameworks: React.js, Next.js, Node.js, Express.js, MongoDB, PostgreSQL, Neo4j, Bootstrap, Tailwind CSS, REST API, PaddleOCR, Tesseract OCR, Ollama, GitHub

Soft Skills: Problem-solving, Team collaboration, Time management, Adaptability, Quick learning

Languages: Malayalam, English, Hindi, Tamil
